

钨钢硬质合金旋转锉 Tungsten Carbide Burs

硬质合金旋转锉是专门为非常坚硬的加工材料设计的，可以适用于去毛刺、倒角、修剪、削尖和切孔等。分为单纹和双纹，有12种规格型号，可以应对各种应用

Solid carbide burs are designed for machining materials of virtually any hardness. They can be used for deburring, milling, chamfering, trimming, and cutting holes. Available in both single-cut and double-cut versions, and in twelve shapes, they are able to handle a variety of applications.

建议 Recommendations

在推荐的RPM设定内操作使用旋转锉

选择最适宜的规格，直径和切割方式

在两个方向恒动运动时要平滑的切割

使用旋转锉工作时不要施加太大的压力

- . Always operate the bur within the recommended RPM
- . Select the appropriate shape, diameter and cut style for the application
- . Use a smooth cutting action with constant movement in both directions.
- . Use light pressure, letting the bur do the work.

尺寸 Size

1. 测量切割长度通常是排除了柄长，即从旋转锉刃部顶端到刃部末端，除非另有规定
2. 所需旋转锉的切割长度，型号以及大小取决于材料的具体要求

- . Cutting length is measured exclusive of shank, from the carbide head point to back, unless otherwise specified
- . Desired cutting length, type and size of material will determine head shape required

包装 Packaging

Shape A 圆柱型硬质合金旋转锉 Cylindrical

产品型号 Item NO.	刃径 Diameter	刃长 Length	柄径 Shank	总长 Overall	支/箱 Box pack

举例：如选购单纹产品编号为A0313M03;如选购双纹产品编号为A0313BM03。
For example: if You choose the single-cut burrs, the serial number is A0313M03; if You choose the double-cut, the serial number is A0313BM03.
